

**PROCESO DE TRANSFORMACION DEL PUERTO DE ASUNCIÓN. PARAGUAY.**

An aerial architectural rendering of the Ciudadano Port of Asunción project in Paraguay. The image shows a large-scale urban and port development plan overlaid on an aerial photograph of the city and river. The plan includes a central area with a large, white, oval-shaped structure, possibly a stadium or arena, surrounded by green spaces and pedestrian paths. To the right, there are several large, modern buildings and a parking lot. The riverbank is lined with a promenade and a series of docks or piers. The overall design emphasizes a mix of urban infrastructure, green spaces, and port facilities.
